Keying Tips

-  Prior to keying claims, it is recommended that frequently used providers be entered into Provider Management.
-  Because ConnectCenter requires the entry of a lot of payer and provider information that is typically the same between different claims, you will find that **copying** an existing claim becomes an essential short-cut in creating new claims.
 - You should copy only claims that have already been validated, sent to the clearinghouse and accepted by the payer.
 - Whenever you need to bill for a patient for whom you have successfully submitted a previous claim in ConnectCenter, copy that claim to save time. Use Claims > Claim Search to search by the patient's name or ID. You may also want to select a Status of "Accepted." Select any claim from the list of matching claims and choose Copy. You will likely only need to update service dates and details.
 - The exception to the recommendation on copying validated claims, occurs for those interested in storing template claims in the Incomplete Claims worklist. In this case, you may copy an accepted claim covering frequently provided services. Save an unfinished version of the copied claim to establish the template. It can be helpful to enter something descriptive as the patient name. Later, select the incomplete claim from the Incomplete claim list and copy it to open a new claim while preserving the template for later use.
-  Any data that resides on multiple tabs need only be updated on one tab.
 - For example, if the Patient Last Name is updated on the Claim Detail tab under the Patient Information section, then the Patient Last Name field on the UB tab will be automatically updated.
-  At any time while creating your claim you can click 'Validate'. Validate will alert you to errors on the claim that would otherwise prevent the claim from being processed.
 - Only claims that are error free can be send to the clearinghouse for processing.
 - It is recommended that you wait to 'Validate' your claim until you have completed all data you expect will be needed; clicking 'Validate' too

early in the data entry process will result in false errors stemming from omission of fields that have not yet been entered.

- ConnectCenter autosaves your claim as you make changes. Claims can be saved as 'work in progress' prior to sending the claim to the clearinghouse.
- Only claims that have NOT been sent and accepted by the clearinghouse can be deleted.

Claim Details

Although the UB04 claim form contains the most critical fields needed on a claim, some fields will be found on the Claim Details tab or the Service Lines Details tab instead.

Note, each field on the UB04 form is also duplicated on either the Claim Detail or Service Line Details. For each field that is duplicated on more than one tab, updating the field on one form will also update that field on other tabs. For example, if the Patient Last Name is updated on the Claim Detail tab under the Patient Information section, the Patient Last Name field on the 1500 tab will be automatically updated.

If your claim has only one additional payer make sure to complete the first occurrence of the 'Other Insurance/COB' section.

Service Line Details
