KF/AHC/AHNE █ :

- Remove hemoglobin requirement as it was only an inclusion criteria in myelodysplastic syndrome trials
- Remove “score less than 3” as very low, low, or intermediate risk equate to a score of 4.5 or less
- Add language to allow for approval in members with contraindication to ESA
- Add condition for approval in patients where trial of ESA is not necessary via NCCN guidelines

KF/AHC/AHNE [REDACTED]:

- Update title to Immune Globulins for clarity
- Include Xembify and the statement this criteria applies to newly marketed immune globulin
- Language changes for clarity
- Permit use of immunoglobulins for Kawasaki disease without aspirin when contraindicated.

- Allow for authorization of only one time dose of 2g/kg in Kawasaki disease due to enhanced efficacy when compared to 400 mg/kg dosed for 4 to 5 days.
- Remove IgG level requirement for a diagnosis of Chronic B-cell lymphocytic leukemia
- Remove requirement bone marrow transplant must have occurred in the previous 100 days as it can be administered before treatment and after 100 days.
- Add dose limit for use in bone marrow transplant 100 days after transplant
- Update dosing and approval duration for Guillian-Barre syndrome to align with appropriate dosing.
