ICD-10 update to Breast and Cervical Cancer Prevention and Treatment Program

Keystone First would like to inform physicians of the following update to the Breast and Cervical Cancer Prevention and Treatment Program (BCCPT):

- As of 10/1 providers must use the new form PA 600B to reflect the ICD-10 diagnosis code sets for breast or cervical cancer. All previous versions of the PA 600B should be discarded.
- The process for initiating the determination of eligibility for the BCCPT program has not changed. Providers should follow the current process for submitting applications for the BCCPT program. The application can be found by visiting the following website: www.pahealthywoman.org.

If you have any questions, please contact your Provider Account Executive or Provider Services at 1-800-521-6007.
